

X-Midas and XMPy Commercial Training Pricing

Effective: January – December 2019

The X-Midas and XMPy training courses are introductory training courses designed to provide a basic overview to creating applications using the X-Midas/ XMPy framework. There is no prerequisite for these courses but some background in software development and a basic familiarity with Linux are expected. For application developers, we recommend the combined X-Midas/XMPy course because the use of Python offers greater flexibility and interoperability with services external to X-Midas.

All pricing assumes class size between 6 and 11 students. Additional charges will apply for class sizes larger than 11 students. The MRSL facility can host class sizes of up to 11 students.

Client Facility prices do not include travel expenses for the instructor. Pricing for travel to the client facility will be negotiated on a case by case basis. The client facility must be able to provide an appropriate training room with X-Midas capable workstations for each student.

	BASE PRICES	
	MRSL Facility	Client Facility
5-Day X-Midas and XMPy Course	\$16,000	\$17,000
Half-Day X-Midas Management Course	\$3,500	\$4,500

The following prices may be subject to change without notice. Alternative pricing may be available based on client needs, client affiliations, and Government requirements.

Cancellation Policy:

Client must cancel within 14 days of course start date or penalty equal to 10% of the value of the Fixed Price portion of the course shall be assessed.
